

HESTIA HARLOW

Having a hard time deciding?

We feel the same way! There are so many ideas and designs we love.
But here are some tips for ways to choose:

Color Palette

Is your home or hosting site a certain color palette?

In the special events industry, we always recommend choosing décor that complements your existing surroundings. Do you love neutrals? Choose a calming color scheme. Like a pop of color? Try referencing the color wheel to find complementary or contrasting colors, which are those directly across from each other.

Cuisine

Choose a theme based on the cuisine you love. Are you a taco lover, a pasta purveyor, or a wine enthusiast, then select the theme that best matches your favorite. When you are at ease with the food, you are a better host.

Going Out?

Is your gathering an indoor or outdoor event? Many of our collections are outdoor-friendly featuring melamine, acrylic, enamel, and metal products. These are great for the beach, the pool, or the park. We try to choose non-disposable items to minimize environmental impact.

Go Wild!

When all else fails, just choose based on your curiosity. Try something fun and different! We love experimenting and can't wait to see how you have styled our collections.
